The new generation NTRL is now available! Developed by the Federal Science Repository Service

### ADA399162

Manufactured Soil Field Demonstrations on Brownfields and Abandoned Minelands. Army Engineer Waterways Experiment Station, Vicksburg, MS. Engineer Research and Development Center.

2001, 9p

#### Related Categories/Subcategories

68C (Solid Wastes Pollution & Control)

48E (Soil Sciences)

50D (Soil & Rock Mechanics)

**Keywords:** Dredged materials, Soils, Soil remediation.

### ADA472104

Military Base Closures: Role and Costs of Environmental Cleanup. Congressional Research Service, Washington, DC.

2007, 7p

#### Related Categories/Subcategories

96 (Business & Economics)

74E (Logistics, Military Facilities, & Supplies)

68G (Environmental Health & Safety)

**Keywords:** Military facilities, Decontamination, Standards.

### ADA491989

Technical and Regulatory Guidance for In Situ Chemical Oxidation of Contaminated Soil and Groundwater Second Edition.

Interstate Technology and Regulatory Council, Washington, DC. In Situ Chemical Oxidation Team.

2005, 173p

#### Related Categories/Subcategories

68D (Water Pollution & Control)

68G (Environmental Health & Safety)

99B (Industrial Chemistry & Chemical Process Engineering)

48E (Soil Sciences)

**Keywords:** Soil remediation, Ground water, Water pollution control.

### DE2003772394

Cooperative Land Reuse Program. Quarterly Report Second Quarter 1999 (April, May, June).

National Inst. for Environmental Renewal, Mayfield, PA.

1999, 152p

#### Related Categories/Subcategories

68C (Solid Wastes Pollution & Control)

**FEDERAL LABORATORY CONSORTIUM  
FOR TECHNOLOGY TRANSFER**

**FLC** *advancing federal  
research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 250 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital research to American businesses and industries.

## NTRL INCREASES ACCESS TO FEDERAL S&T REPORTS

NTIS is launching greater access to federally funded science & technology information and reports. Starting in October 2014, U.S. citizens will have free access to all electronically-available documents in the NTIS collection.

Currently there are more than 850,000 documents digitized for free public access. For the first time, Individuals will have the option to subscribe to the NTRL in order to benefit from the Premium features of the database, such as advanced search and more free downloads (NTRL Premium Individual).

Premium Institutional subscribers (including corporations) will continue to have access to the more than 2.8 million records with a variety of enhanced features as listed in the chart below.

Please feel free to contact me if you have any questions.

## Subject Category Codes/Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

NATIONAL TECHNICAL REPORTS LIBRARY  
U.S. Department of Commerce

**The National Technical Reports Library (NTRL) enhances accessibility to the NTIS technical reports collection. It provides access to:**

- Bibliographic records of more than 2,000,000 technical reports
- Downloadable full text of 800,000 of these reports in PDF format

Subscription rates are based on institutional FTE levels.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 800k full-text documents in PDF format that are directly linked to that bibliographic database.

For more information, go to: <http://www.ntis.gov/products/ntrl.aspx>

## NTIS e-Alerts

Every week, NTIS receives more than 1,000 publications, studies and valuable data from over 350 U.S. government agencies and international sources. This information is the result of billions of dollars of R&D and studies sponsored by the United States Government.

NTIS *eAlerts*, delivers summaries of these publications right to your desktop, bi-weekly, in your field of interest. For more information visit
